

Press release on Help desk for Children

Covid 19 pandemic has created a stressful situation for everyone where children are becoming the worst sufferer. Absence of normal activities, parent's job loss, economic hardship or the serious illness or death of close ones - can leave children feeling traumatized.

WBCPCR has introduced a special desk for children to help mitigate the harms that children experience. This help desk consists of psychiatrists, psychologists & counsellors who will be available free of cost for guiding and supporting children to come out of such stressful situations and stay well.

The Commission has circulated these help line numbers in all the districts and uploaded them on its website (www.wbcpcr.org) and social media pages.
